

Infrasonix, Inc. Update

May 2019

It is a pleasure to update you on the recent activities of Infrasonix, Inc. and to share with you the growing potential of our business future.

It is with a great deal of satisfaction that we can report the results of our recent visit to the Kennedy Space Center in Florida and the meetings with the entire team working with the Infrascopes technology. For the Infrasonix team to see first-hand that so much work has been accomplished and that the results of that work are in total confirmation of everything we have been working toward was to say the least exhilarating.

From left to right:

John A. Leverett, Director Infrasonix. Dr. Ken Cohen IMSS/NASA. Dr. Daniel Woodard IMSS/NASA. Rolando Valdez NASA/KSC. Dave Bush NASA/KSC. Dr. Nigel Flynn, President/founder Infrasonix. Also present at these meetings and handling the camera was Mr. John Mitchell lead technology consultant at Infrasonix.

L to R: Dave Bush NASA. Rolando Valdez NASA. Dr. Daniel Woodard IMSS/NASA. Dr. Ken Cohen IMSS/NASA

The IMSS/NASA team pictured above has truly committed themselves to the confirmation of all the aspects of the Infrasound technology over the past year. They have not only been able to confirm all of the Infrasonix diagnostic concepts but to discover a very promising new range of monitoring and diagnostic opportunities.

Kind Regards,

**Nigel J. Flynn**

**Chairman & President  
INFRASONIX, Inc.**
